

Posting

Searching for Medical Intelligence Analysts and Medical Analysts for some work we have in the DC outskirts supporting US government; as well for future opportunities we have coming up...

People who possess at least a Masters (but preferably a PhD) in Immunology, Virology, Toxicology, Pharmacology, Biology, Bio Chemistry, Biodefense, Epidemiology or Public Health... related fields also).

They should possess some government experience and have a clearance... or at the very least be clearable.

They should also have experience and/or knowledge in the following areas:

- drug delivery and discovery (including novel vaccines and antivirals)
- knowledge of molecular genetics of viral evolution
- knowledge of development production and application of veterinary vaccines
- knowledge of US and EU drug regulatory issues
- 2 years experience overall and an interest in working in complex medical intelligence

Contact Traci Beavers at beavers_traci@ne.bah.com and mention the posting to the AAAS listserve.
